EDUCATION

CERTIFICATE OF COMPLETION, FULL-STACK SOFTWARE DEVELOPER
Boise Codeworks | 2020

M.S. STATISTICS
Washington State University | 2017

M.S. BIOLOGY
University of Idaho | 2012

EXPERIENCE

SOFTWARE DEVELOPMENT STUDENT

Boise Codeworks | 08/ 2020 - Present

- Completed an immersive software development course developing full stack web applications utilizing VUE.js, Node.js and C# .NET core frameworks.
- Worked as part of a team of 2-4 developers to create Full-Stack applications utilizing the SCRUM method in an agile development environment.

DATA ANALYST INTERNATIONAL REVENUE

Vacasa | 12/ 2019 - 06/ 2020

- Delivered revenue forecasts by formulating complex SQL queries and optimized Vacasa's internal revenue analysis software as a QA advisor.
- Oversaw meetings with Vacasa's 3rd party data partners to minimize error and eliminate discrepancies between databases.
- Cultivated a culture of data driven insights with diverse sales teams to maximize revenue volume in international markets.

REGIONAL REVENUE ANALYST

Vacasa | 10/ 2017 - 12/ 2019

- Compiled, analyzed and presented data from the Vacasa data warehouse to provide business insights to regional operations staff accelerating revenue growth in Texas and Idaho.
- Spearheaded technical meetings to improve knowledge of Python and SQL coding and helped other analysts optimize their portfolios through automation.
- Mobilized a SQL development team to formulate specialized SQL scripts to diagnose and improve revenue performance across the entire domestic U.S. by debugging under-performing domestic data models.
- Designed SQL scripts to improve efficiency and overhauled legacy SQL scripts to streamline regional reporting and analyses.

APPLICATIONS

KEEPR

An image forum application where posts can be created, saved by users into vaults, and accessed by other users. Utilizes a Vue.js front end with a C# back-end framework and a MySQL database.

DCDR

A polling application that allows users to host polls with steam integration and allows other users to vote in those polls. Utilizes a Vue.js front-end with a Node.js back-end and MongoDB.

BUGLOG

A bug tracking application for small teams that utilizes a Vue.js front-end with a Node.js back-end.

GAME-FORUM

A gaming forum where users can post and comment on other users' posts. Built utilizing Javascript for the front end, a Node.js back-end, and MongoDB.
